

Vario 6

The Easyrig Vario 6 is a lightweight support system that is 20% lighter compared to the Vario 5 made for cameras weighing between 4-14 kg (9-31 lbs). You will be more agile with the Easyrig Vario 6 compared to the older generation.

Featuring a new sleek design and completely new mechanism in the power pack, it allows all users to adjust the tension of the line themselves without needing to ask for help.

The Easyrig Vario 6 can be retrofitted onto all our previous vests, so if you're interested in upgrading your current Easyrig, you'll only need to purchase the support bar by itself.

You can attach any upper arm in our lineup to the Easyrig Vario 6.

Designed and made in Sweden

The **Easyrig Vario 5** has an adjustable weight range from 5-17kg (11-38 lbs) and a strong weight range from 10-25kg (22-55 lbs) You can change the tension on the line with the adjustment tool

The **Easyrig Vario 5** gives you the same advantages as our other Easyrig models with the added benefit of being able to adjust the line tension to adapt to many different cameras and configurations.

The **Easyrig Vario 5** still delivers the same steady hand held shots while relieving strain on your back, neck and shoulders. The load is redistributed to the hips allowing you to shoot hand held in comfort for hours.

Art. No: VG582A

The **STABIL G3** is our dampening upper arm designed to smooth out your shots while walking. The upgraded G3 version comes with a foldable upper arm, hanger & a locking lever for locking the arm in the 90° position.

The **STABIL G3** together with Vario 5 Standard handles weights between 5-17kg (11-38 lbs). The **STABIL G3** works best with gimbals.

Art. No: VG582STQ

Easyrig
Minimax

Art. No: MM100 + MM055

The **Easyrig Minimax** is created specifically for lightweight camera setups. Supporting cameras weighing 2 - 7 kg (4-15 lbs)

The Swedish-engineered power spring system is specially designed to allow operation with a wide range of cameras.

A special release mechanism safely protects the Easyrig Minimax internals from weight overload.

The **Easyrig Minimax** is compatible with all Easyrig vests such as the Cinema Flex.

Art. No: MF100STL

The **STABIL Light** was developed to support gimbals between 2-7kg (4.4-15.4 lbs). It will help stabilize hand held shots to a certain degree while protecting your back. This enables you to operate the gimbal and camera for much longer periods of time.

The design is based on the original STABIL and has the ability to lock the arm so it functions as a standard Minimax. We have also made it more light weight so the user can stay agile.

Easyrig

The **EASYRIG 3 Cinema** is our basic system which has a fixed shock absorber.

The maximum load on the **EASYRIG 3 Cinema** is 25 kg (55 lbs) with the 1 000 N gas shock absorber.

Art. No: EA3X2
